LinkedIn: sanjana-dissanayake

ABOUT ME

Computer Science undergraduate (following specialized pathways in Artificial Intelligence) with a strong passion for technology and a strong interest in AI and machine learning. Experienced in full-stack development and modern web technologies using JavaScript and React, with backend development in Node.js/Express, .NET/C#, and Spring Boot (Java).

Thrives in fast-paced environments, applying technical skills, continuously learning, and contributing to impactful projects. Actively engaged in university societies and open-source communities, with a strong focus on collaboration and growth.

EDUCATION

Bsc.(Hons.) in Computer Science,University of Kelaniya *2023 - Present*

Specialize in Artificial Intelligence (Current GPA - 3.75)

G.C.E Advanced Level, D. S. Senanayake College, Colombo 07 *2012 - 2022*

Physical Science Stream - 1A 2B

G.C.E Advanced Level, D. S. Senanayake College, Colombo 07 *2018*

G.C.E Ordinary Level- 8A 1B

CORE COMPETENCIES

- **Programming Languages** - Python | C | C# | Java JavaScript
- **Backend** - Node.js | .NET (C#) | Springboot (JAVA) Express.js
- **Frontend** - React | TailwindCSS
- **Machine Learning / AI** - TensorFlow | PyTorch | Groq Hugging Face | Google Colab
- **Databases** - SQL | PostgreSQL | Redis | MongoDB Supabase
- **Other** - Git | GitHub | Docker | CI/CD | Linux | AWS Figma

PROJECTS

CuraNex – AI Demand Forecasting & Inventory Optimization Platform | Project

Technical Stack – Python, React (TypeScript), TensorFlow, PyTorch, XGBoost, LightGBM

- CuraNex is an AI-powered platform built for Hemas company to forecast pharmaceutical drug demand, optimize inventory, and detect stock anomalies to improve supply chain efficiency and ensure timely availability of medicines. It uses a scalable ML pipeline combining deep learning models (TFT, N-BEATS) with gradient boosting methods (XGBoost, LightGBM), enhanced through feature engineering to improve forecasting accuracy.
- It also includes an interactive React (TypeScript) dashboard with a modern glassmorphism UI for forecast visualization, anomaly monitoring, and inventory recommendations.

AI-Powered Portfolio Assistant with RAG | Project | Live Demo

Technical Stack – React, Tailwind CSS, Hugging Face, Upstash Vector DB, Groq (LLaMA 3.1), Redis

- Developed an AI-powered portfolio assistant using a Retrieval-Augmented Generation (RAG) pipeline with Upstash Vector DB and automated GitHub data updates via cron jobs to deliver real-time, personalized responses about projects, skills, and experience. Integrated Hugging Face embeddings and LLaMA 3.1 via Groq API for fast semantic search and inference, combining vector retrieval with Redis-based chat history and summarization.

CodeMart – Digital Project Marketplace | Project

Technical Stack – React (TypeScript), ASP.NET Core, Entity Framework Core, PostgreSQL (Supabase), Docker, Stripe API

- CodeMart is a full-stack digital marketplace for trading software projects, featuring secure payments via Stripe, Google OAuth login, and role-based access with JWT authentication.
- It includes a RESTful backend built with ASP.NET Core and Entity Framework Core integrated with PostgreSQL (Supabase), supporting project listings, orders, reviews, and transactions.
- The platform also features a responsive React (TypeScript) frontend enhanced with GSAP animations, and a modern UI using Tailwind CSS and Radix UI.

Whisper – Full-Stack Secure Messaging App | Project

Technical Stack – React (TypeScript), Java, Spring Boot, PostgreSQL, JWT, WebSockets, Gmail SMTP, Cloudinary

- Whisper is a full-stack real-time messaging application featuring secure authentication with JWT and OTP-based user registration via Gmail SMTP, along with instant messaging powered by WebSockets.
- It includes a backend built with Java, Spring Boot, and PostgreSQL, supporting RESTful APIs, real-time communication, and Cloudinary-based media management.
- The frontend is developed using React (TypeScript) and Tailwind CSS, with features such as user profile management, dynamic contact modals, and a structured architecture using the Context API.

HR Management System – Desktop Application | Project

Technical Stack – C#, WPF, SQL Server

- Developed a C# WPF-based HR management system to handle employees, departments, attendance, leave, and payroll, with role-based access for Admin, HR Manager, and Employee.
- It includes modules for employee and department management, attendance tracking with automated work-hour calculation, leave management workflows, and payroll processing with payslip generation and reporting (PDF/Excel export).

CERTIFICATES

- Microsoft AI & ML Engineering - | Credential ID: ZVB7WDS3UP4A
- AWS Cloud Technical Essentials - | Credential ID: Y5RI8SVEPDZ0
- C# with Microsoft – | Credential ID: sanjana2002-fcswm
- AI/ML Engineer - Stage 2 | SLIIT Faculty of Computing | Credential ID: txcwyvgb7i
- AI/ML Engineer - Stage 1 | SLIIT Faculty of Computing | Credential ID: zocotykvii

ACHIEVEMENTS

- KelaniXtreme - 1st Place (IEEE Student Branch University of Kelaniya)
- AITHON 2026 - Top 30 Finalist & MVP Phase (Hemas Holdings PLC)
- Hackventure 1.0 – Semi Finalist (AIESEC in University of Kelaniya)
- IX'25 Designathon – Top 20 Team ((IEEE Student Branch of IIT)
- Research Symposium – Selected Project Presenter (University of Kelaniya)
- Volunteer of the Month – IEEE Student Branch, University of Kelaniya (March 2024)

EXTRA-CURRICULAR

- Secretary – Free and Open Source Software Community, University of Kelaniya (2025–Present)
- Treasurer – Free and Open Source Software Community, University of Kelaniya (2024–2025)
- Treasurer – Red Cross Society, D.S. Senanayake College (2021–2022)
- Member - Computer Science Student Association (2023 - Present)
- Member - IEEE Computer Society, University of Kelaniya (2023 - Present)
